*Claim Rejections - 35 USC § 103*

1. Claims 28-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kung et al (6508756) in view of Lundback (4957477).

See previous office action.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The remarks made by applicant have been considered, however the above rejections are still deemed to be proper. The purpose of using radiopaque material, as taught by Lundback, is considered to be self-evident. In the present context, such material would be known by the skilled artisan to facilitate positioning of the device, as well as to observe if the device has slipped from the proper placement on the heart, when the patient's chest is closed. Col. 4, line 32 of Kung teaches that the device can be

initially positioned on the heart without a thoracotomy. Using radiopaque material would facilitate this process.
